

Stanley Nguyen

Boston, MA • (617) 785-4148 • stanley.nguyen141@gmail.com • <https://lil-stan.github.io/>

EDUCATION

Johns Hopkins Whiting School of Engineering, Baltimore, MD

Expected August 2027

Master of Science in Electrical and Computer Engineering

Boston University College of Engineering, Boston, MA

May 2023

Bachelor of Electrical Engineering

WORK EXPERIENCE

Raytheon (RTX), Tewksbury MA

December 2025 – Present

Test Development Design

- Designed and developed custom test hardware (PCBs, fixtures, and ITAs) and supporting software/firmware ATP for test systems
- Collaborated with product design, manufacturing, and external suppliers to define test strategies and implement robust test solutions
- Led troubleshooting and root cause analysis efforts across forward and reverse flow CCAs, identifying failure modes and improving test coverage
- Developed and optimized test processes for ARs, SPs, and Exciter modules on Ultra/Phantom Strike radar systems, increasing first-pass yield by **30%**

Systems Engineer

July 2023 - December 2025

- Improved safety compliance and reduced risk exposure by implementing system-level safety reviews across major defense programs
- Reviewed electrical and mechanical designs to identify potential hazards and ensure compliance with U.S. military safety standards
- Contributed to mission-critical safety design evaluations for deployed systems across multiple countries, focusing on the maintenance of PATRIOT electrical and mechanical hardware, as well as software/firmware updates
- Provided technical solutions to Mechanical and Electrical design teams, ensuring that drafted work instructions and technical manuals for support and field engineers are safe and practical for integration

Boston University, Boston MA

September 2022 – May 2023

Circuits Lab Assistant

- Repaired and maintained oscilloscopes, function generators, and PCB milling machines to ensure consistent lab operation.
- Assisted students with experimental setup, troubleshooting, and PCB fabrication.

National Grid, Waltham MA

May 2022 – August 2022

Transmission Asset Engineering Intern

- Analyzed asset condition data and proposed reliability upgrades, supporting \$10M+ in capital planning for transmission infrastructure
- Collaborated with cross-functional teams to apply strategic asset-management practices and enhancements to transmission system reliability

PROJECTS

FM Modulator with Optical Link

- FM signal modulator with Tx and Rx circuits through an optical link using an IR transistor and a photodiode
- Design encapsulates a signal pre-amp, modulation with a 555 timer as a VCO, signal demodulation with a photodiode TIA, pulse-averaging discriminator, and a class-AB power amp at the output stage

SKILLS

Software: C/C++, Matlab, Python, Verilog, DOORS, Jira, MS Office Suite, SimScape (Simulink)

Hardware: DMMs, Scopes, Micro Controllers, CAD, Soldering, PNAs, VNAs

CAD/Design: SolidWorks, Onshape, Creo Parametric, LTspice
